RASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claim 2 has been canceled. Claims 1,3-29 are pending. The method claims will now be rejoined with the compound claims that are deemed allowable.

The rejection under 35 USC 112, 1st paragraph, is dropped in view of the amendment to the claim limiting variable V to nitrogen.

The double patenting rejections have been dropped in view of the terminal disclaimers filed and accepted over copending applications 10/346,684 and 10/759,555.

It is known in the pharmaceutical arts to treat damage to skeletal muscles resulting from trauma, shock, to preserve donor tissue and organs used in transplants, and to cardiovascular disease, wherein the cardiovascular disease is atrial arrhythmia, intermittent claudication, ventricular arrhythmia, Prinzmetal's (variant) angina, stable angina, exercise induced angina, congestive heart disease, or myocardial infarction. See Elzein et al (WO 01/62711) abstract; Zablocki et al (WO 01/62744) abstract. The references are of record in parent 10/198,237.

Memoli et al (WO 98/21190) teach it is known in the pharmaceutical arts for compounds that treat cardiovascular disease to also raise HDL. See page 7 lines 1-8. The references are of record in parent 10/198,237.

Taylor et al (see abstract, page 65 conclusion) and Singh et al (See abstract) teach that diabetes is a risk factor associated with cardiovascular disease. The references are of record in parent 10/198,237.

For the above reasons, one of ordinary skill in the art would have known at the time the invention was made how to use said compounds.

Art Unit: 1625

The prior art neither teaches nor suggests the claimed compounds or their use. Claims 1, 3-29 allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
